

Readers summarize information by section

© SMEKENS EDUCATION SOLUTIONS

The worksheet is designed for summarizing information by section. It consists of six circular diagrams arranged in two rows of three. Each circle is divided into five equal segments by lines radiating from the center to the edge. The top row of circles has a thought bubble attached to the top-left, top, and top-right segments respectively. The bottom row of circles has a thought bubble attached to the bottom-left, bottom, and bottom-right segments respectively. A large, empty rectangular box is positioned in the center of the page, between the two rows of circles.
