

# Summarize information by section

© SMEKENS EDUCATION SOLUTIONS

The worksheet is designed for summarizing information by section. It consists of six circular diagrams arranged in two rows of three. Each circle is divided into five equal segments by lines radiating from the center to the edge. Each circle is accompanied by a thought bubble: the top-left, top-middle, and top-right circles have bubbles at the top; the bottom-left, bottom-middle, and bottom-right circles have bubbles at the bottom. In the center of the two rows is a horizontal rectangular box. All elements are drawn with green outlines and yellow/orange accents.
