NO. Still don't care enough;
still pollute
& waste

Repeat key words from the prompt...

...and state the synthesis.

Although environmental awareness has increased, the statistics show that most people don't care enough to curb their pollution and waste.

Repeat key words from the prompt...

...and state the synthesis.

Source 1 states...

Although environmental awareness has increased, the statistics show that most people don't care enough to curb their pollution and waste.

Source 2 cited "Americans use 100 gallons of water per day" (that is "100,000 gallons per year"), and yet "only 1% of the world's water" is "usable."

Repeat key words from the prompt...

...and state the synthesis.

Source 1 states...

This is important

because...

Although environmental awareness has increased, the statistics show that most people don't care enough to curb their pollution and waste.

Source 2 cited "Americans use 100 gallons of water per day" (that is "100,000 gallons per year"), and yet "only 1% of the world's water" is "usable." This excessive water use can come from long, leisurely showers and/or maintaining lush green lawns. This sense of entitlement is reckless. Regardless of the reason, wasting water at this rate will likely create a scarcity for all.

These details demonstrate...

because...

Although environmental awareness has increased, the statistics show that most people don't care enough to curb their pollution and waste.

Source 2 cited “Americans use 100 gallons of water per day” (that is “100,000 gallons per year”), and yet “only 1% of the world’s water” is “usable.” This excessive water use can come from long, leisurely showers and/or maintaining lush green lawns. This sense of entitlement is reckless. Regardless of the reason, wasting water at this rate will likely create a scarcity for all.

Source 3 reported that only “200 million people participated” in the “20th Anniversary celebration.” With billions of people in the world, that represents only a small fraction of the overall population. So many more people chose not to participate.

These details prove that Nelson’s concerns have not been addressed since the vast majority of people do not believe the severity of the problem needs to impact their lives.

Based on information in both print texts and the video, write an essay arguing whether Gaylord Nelson’s original concerns about the environment have been addressed.
