

INFORMATIVE—EXPLANATORY

Frogs

To day befor We had
 rilda groos Mrs John
 red us a strorry a
 baout frogs. We had
 to riet a baout frogs.
 We haf a tadpol in
 the Sciens Sentr.
 It has 2 bac

legs and wen it
 has 2 frunt ligs
 its tal disapirs
 and it can not eat
 wen its maot is
 chejn. Then the
 Scknn gets to little
 and the frogs pol
 off thrr scknn an

thea eyt it. Saum
 of the frogs bloo
 baabools. Frogs lad
 eggs that look like
 jete and the fish eyt
 some but some
 hach to tadpoos.
 It gros bigr and
 bigr and bigr.

ANNOTATION: Frogs

Today before we had writing groups, Mrs. John read us a story about frogs. We had to write about frogs. We have a tadpole in the science center. It has 2 back

legs and when it has 2 front legs its tail disappears. And it cannot eat when its mouth is changing. Then the skin gets too little and the frogs pull off their skin and

they eat it. Some of the frogs blow bubbles. Frogs laid eggs that look like jelly and the fish eat some, but some hatch to tadpoles. It grows bigger and bigger and bigger.
