

Describe a symptom of binge-watching.

WRITTEN RESPONSE: **BASIC FORMULA**

©SMEKENSEDUCATION

Another likely sign of binge watching is the decline in one's physical appearance. Source 3 depicts the viewer with messy hair, food on her face, and mascara streaks. Source 2 reveals more than messy hair but significant hair growth, too. Binge watching often impacts the viewer's physical appearance and overall hygiene routine.

Describe a symptom of binge-watching.

WRITTEN RESPONSE: WITH ELABORATION

Another likely sign of binge watching is the decline in one's physical appearance. Source 3 depicts the viewer with messy hair, food on her face, and mascara streaks. It is evident that the individual has not showered—or at least not washed her face. Source 2 reveals more than messy hair but significant hair growth, too. It's important to note that hair growth occurs over days and weeks. Binge watching often impacts the viewer's physical appearance and overall hygiene routine.
