

AUGUST Coaching Session

IMPLEMENTATION FOCUS

Include comprehension instruction within the daily schedule.

- Don't/Can't wait to teach reading skills until after procedures established and stamina built.
- Readers need phonics and comprehension.
- Separate the daily MINI-LESSON from daily whole-class reading experience.

CURRENT STATUS

Establish a rhythm to the daily mini-lesson.

- · Approximately 15 minutes.
- · The whole class is present.
- · Occurs daily.
- · Skill-based (i.e., tell what and teach how).

NEXT STEPS

Put minutes on paper and build a schedule.

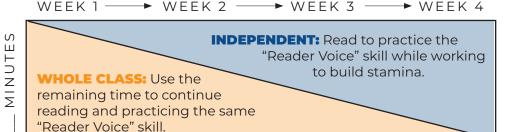

AFTER each "Reader Voices" mini-lesson, transition to You-do practice.

- · Introduce & read texts, pausing to ask questions & guide students to infer answers.
- · Read many different texts with students at the beginning of the year.
- · Vary methods of "reading" to balance building reader stamina and consuming "required" texts.
 - · Students reading silently & independently.
 - · Teacher reads aloud; students follow along.
 - Students take turns reading aloud; peers follow along.
 - · Students **read aloud** within small groups.
 - · Students read aloud within pairs.

Each of these is done within the teacher's presence. Pause the reading to check for general gist/comprehension.

Grades 3-5 | *Playbook Pro* Coaching Session | August

IMPLEMENTATION FOCUS

Target comprehension "fundamentals" the first weeks of school.

 WEEK 1 | Readers have conversations in their heads.

- WEEK 2 | Readers record their MANY thoughts.
- WEEK 3 | Readers use both voices to make inferences.

 WEEK 4 | Readers infer plausible/realistic answers.

CURRENT STATUS

Focus on during-reading thoughts.

· Put signs back to back to emphasize readers stop and say something.

Focus on the Reading & Thinking Voices for several days.

- · Model (& practice) them with various text mediums, genres, subjects.
- · Model (& practice) multiple thoughts while reading a text.
- · Model (& practice) having different thoughts while reading a text.

NEXT STEPS

Make mini-signs for independent and whole-class practice.

Read "Text Considerations" column carefully.

- · List/Determine which B.O.Y. texts you will use on Days 1-10.
- Plan out THOUGHTS only— no questions needed.

Emphasize that making inferences is a bigger process.

- · Day 11— Teach all 5 steps to make an inference.
- · Day 12— Review all 5 steps.

Pose simple inferential questions—that kids CAN answer.

 \cdot Days 11-12— Use recognizable visual texts.

Identify texts for Days 11-16 on familiar topics.

 Plan out text details & thoughts for each.

· Days 13-15— Use simple print text.

Define "relevant" details and tie them to the question.

 \cdot DAY 16— Focus on Steps 2-3. Reuse texts from Days 11-15— but change the inferential questions.

Rely on the 5-step inference process when you do NOT "know" the answer. (Pose inferential questions— that kids likely CANNOT answer.)

· Days 17-20— Focus on Step 4. Provide additional thinking stems.

Identify texts for Days 17-18 on UNfamiliar topics.

 Plan out text details & thoughts for each.

Identify excerpts for Days 19-20 with UNfamiliar words.

 Plan out context clues & thoughts for each.
